

Semi-Automated Manual Canning System (SAMS 1.0)

Description:

Table top 3 head filler seamer complete with frame, capable of filling 15 cans per minute with 1 operator. Cost effective and labour efficient. Handles multiple can heights.

Incredibly compact design

Operational space of 8 sq. feet.

Totally hands free filling, lid feed and seaming

Once the cans are loaded into the shoot the operator doesn't touch them again until they are filled and seamed.

Automatic lid application includes under lid gassing

Provides air pick up levels as low as the fully automated canning lines.

Touch screen control

Auto/manual mode

Automatic CIP

Fill level and FOB adjustments
