Production Run – Over/Under Customer Order

Due to the speed of the production line, it is impossible to limit production to exactly the quantity of cans ordered. The production run is subject to a 10% over run and/or a 10% under run due to manufacturing conditions. The final quantity produced within +/- 10% of the original order remains the responsibility of the Customer.

Any production over run within the above restriction will be held by Ball Corporation at no charge for a period of six months from the date of production. At that time, the Customer will be invoiced for any remaining inventory. The Customer will be offered the option of taking delivery of or scrapping the remaining inventory.
